

Outdoor Modular Architecture

T-BOX

Outdoor Modular Architecture
Expand your space.
Redefine its potential.

T-Box is a premium modular architectural system designed to create new outdoor environments, extend existing buildings, and transform open spaces into fully functional, elegant, year-round destinations.

From urban plazas and hospitality venues to retail, corporate and residential projects, T-Box delivers a tailor-made solution where design, flexibility and performance come together.

More Than a Pergola

T-Box goes beyond the concept of a traditional pergola.

It is a true architectural system, engineered to integrate seamlessly into any environment while providing the strength, comfort and versatility of a permanent structure.

Its clean contemporary design, structural reliability and modular approach make it suitable for projects of every scale.

- Contemporary design
- Fully bespoke engineering
- Unlimited modular expansion
- Full-height glazed or solid enclosures
- Integrated architectural lighting
- Four-season comfort

Unlimited Modularity

Every project starts with a module and evolves without limits.

T-Box modules connect seamlessly to create spaces of virtually any size, from intimate meeting rooms to large hospitality lounges, retail environments and event venues.

A flexible system offering complete architectural freedom.

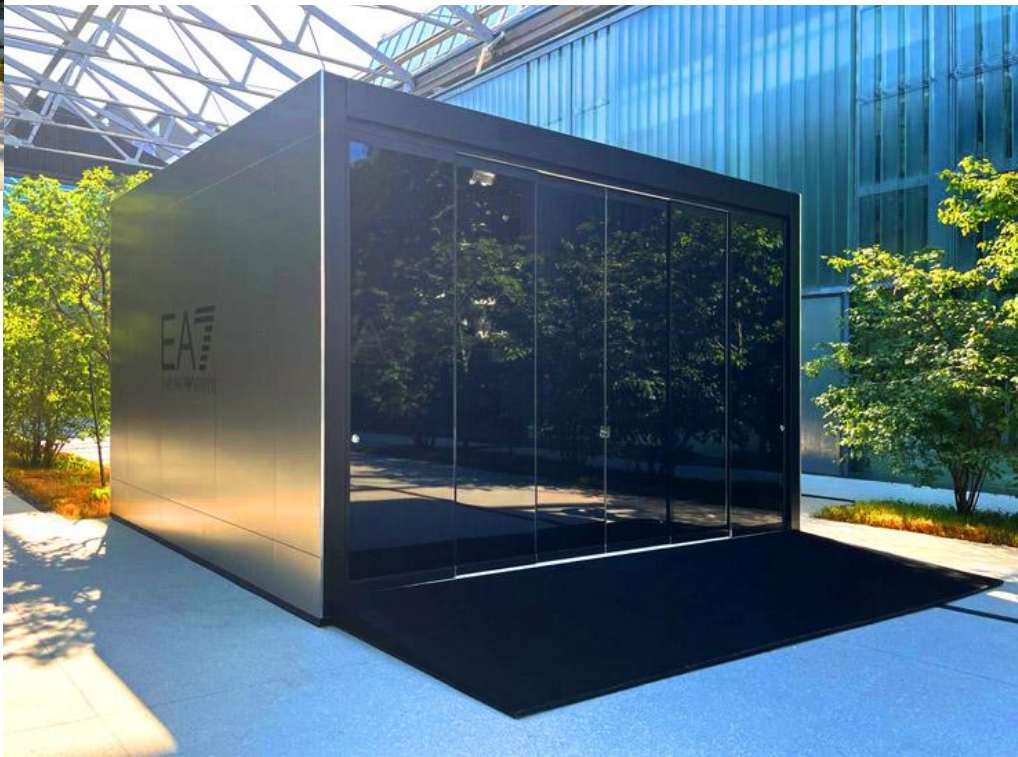

Turning Outdoor Space into Business Value

Unused outdoor areas represent untapped potential.

T-Box transforms them into comfortable, weather-protected environments that generate new opportunities for hospitality, retail, events and corporate activities.

The result is more usable space, improved customer experience and increased commercial value.

Exactly what your project needs.

Tailored Around Your Vision

Every T-Box is designed around the client's specific needs.

Available options include:

- Sliding glass walls
- Solid or graphic panels
- Integrated LED walls
- Custom cladding
- Architectural perimeter lighting
- Premium finishes and bespoke colours

Applications

Designed for a wide variety of sectors.

Hospitality

Restaurants, cafés, hotels, resorts and outdoor dining.

Retail & Brands

Pop-up stores, flagship stores, temporary retail, showrooms.

Corporate

Meeting rooms, collaborative spaces, executive lounges.

Public Spaces

Information centres, exhibitions, welcome areas and temporary installations.

Residential

Outdoor living, winter gardens and premium extensions.

Events

VIP lounges, hospitality areas, exhibition spaces and corporate events.

Built to Last

T-Box structures are manufactured from hot-dip galvanized steel with a durable powder-coated finish, ensuring exceptional durability and minimal maintenance.

The engineering allows large clear spans with fewer structural columns, creating open, elegant spaces with maximum design freedom.

Designed for Every Season

T-Box creates comfortable environments throughout the year.

Complete weather protection, combined with heating and cooling integration, ensures continuous use in every season without compromising aesthetics or comfort.

A New Way to Build Space

T-Box is more than a modular structure.

It is an architectural platform for creating spaces that generate value, strengthen brand identity and deliver memorable experiences.

Let's design your next space together.
